Acoustic *Walls*

Solving acoustic challenges in small and narrow spaces can be challenging with most of the floor occupied by other furniture. In such spaces, acoustic wall panels are an effective solution. We offer an extensive range of standard and bespoke products to spark your creativity and endless imagination – in both small and big spaces. Now completely glue-free.

Acoustic *Desk Dividers*

Acoustic partitions for desks should not be missing in any office. Especially in open-plan offices, they give a bit of privacy and muffle telephone conversations. All products can also be produced with your individual size or perforation on request. The lightweight of our material makes the dividers especially attractive for desks with a motor.

One collection. *Eight* colour families. *Unlimited* possibilities.

This colour collection is created in partnership with Colour Hive with an understanding of developing and enduring colour trends, each with a story to tell.

ARCHISONIC®

Pioneering *sustainability* and **acoustics.**

The building sector is the world's largest single source of energy-related greenhouse gas emissions. Half of the energy consumed in the construction of new buildings is used for the production of materials and products.

For us, waste is a crime. Sustainable indoor acoustic products can be a simple first step in making a much-needed change. That's why we developed ARCHISONIC®, arguably the most flexible and high-performing acoustic material on the market. Made from recycled PET bottles.

The entire ARCHISONIC® product range is LEED and Cradle to Cradle™ certified. Due to its flexible applications, it offers the design and architectural community limitless possibilities for addressing acoustic challenges.

ARCHISONIC®

Quiet Neutrals

12mm & 24 mm

In an ever-connected increasingly urban age, we are all at times in search of a moment of silence. With this in mind, we look to the quieter elements of nature as inspiration for a series of calming and balanced neutrals.

Warm Naturals

12mm & 24 mm

While there is much to be hopeful about, we find ourselves living in a time of uncertainty. To counter these feelings of anxiety, we are drawn to environments that reassure and hold us in a virtual hug.

Living Greens

12mm & 24 mm

Environmental awareness and a deepening appreciation of biophilia drives a desire for ever more greenspaces.

Elemental Blues

12mm & 24 mm

We had to pay tribute to our blue planet with a collection of sea- and sky-inspired hues. As our air and water quality are increasingly under threat, the appeal of nature's blues becomes stronger.

ARCHISONIC®

Soothing Pastels

12mm & 24 mm

This directional colour collection is curated from our core palettes of Elemental Blues, Living Greens and Warm Naturals. Combined with shades from the Quiet Neutrals collection and natural materials, these colours take on a timeless quality.

Warm Naturals

While there is much to be hopeful about, we find ourselves living in a time of uncertainty. To counter these feelings of anxiety, we are drawn to environments that reassure and hold us in a virtual hug.

Elemental Blues

We had to pay tribute to our blue planet with a collection of sea- and sky-inspired hues. As our air and water quality are increasingly under threat, the appeal of nature's blues becomes stronger.

Energetic Brights

Here to make an impact, our boldest, clearest hues are collected in a story of optimism and energy. As a counterbalance to enduring trends for tone-on-tone layers of colours, there is also the welcome return of clear and saturated brights.
